

Updated Cost Estimate on Digital Sign

1. Final price of sign from L.A. Neon including installation and electrical connection - \$44,689.00 not including GST.
2. Estimated cost of electrical from Fortis is \$2,000.00 plus GST
3. Estimated cost of finishing the base of the sign is \$2,000 - \$4,000 depending on materials used, plus GST.
4. We have budgeted \$50,000 in the current Mill Rate Budget for the sign.
5. I estimate we can install the sign for \$48,689 plus \$2,434.45 GST
6. Total cost of \$51,123.45.

Village Council

Village of Glenwood

Dear Mayor Peterson and Councillors Lybbert, Wickhorst, Doney, and Ford

I would like to address you about the Electronic sign to inform citizens of Glenwood and area about activities here in our village and area. The grant was applied for by the Twin Rivers Economic Development Society. It was approved 2 – 3 years ago. It is time to get the sign put in place and operational. I am a member of the society and have been actively involved for several years.

I would like to see the sign put up some where on Main Avenue in the business area. When we discussed the placement of the sign at our last meeting we decided that above the community bulletin board would probably be the best spot- if it has to go on village property. Can we please get some action and get it operating for our activities this summer – preferably by July 1st.

If there is any thing the members of our society can do to help get this into action please contact our Chairman Eddie Williams.

I would like this letter read and discussed at your next village council meeting on May 20th.

Thank you for reading this letter.

Jolane Shipley
